

## XX Dressing Table

A capsule-shaped mirror pivots between a pair of sculpted wooden legs, which double as stands for hats or coats. Two drawers allows for beauty products to be stored away. As the mirror rotates freely through 360 degrees it can be locked using brass knobs at any angle: 90 degrees to form a top and serve as an occasion table, or 180 degrees to display artwork on the rear of the mirror.

### Materials

recycled teak | birch plywood | mild steel | mirror | brass knobs  
artwork not included
